From: Katy Spenser

To: The museum boards of directors

Theme: The attendance of museums and galleries

Date: 11.02.2019

Nowadays, it is necessary to remember about the importance of museums and galleries not only in the sphere of education but also in our everyday lives. I have analyzed the number of people who attended the museums in 2013, 2015 and 2017 in order to know the popularity of this type of entertainment.

According to the data, the number of people who visit some museums is increasing with the rapid rate. In 2013 the most popular place was the National Gallery was more popular than the British Museum but in 2015 and in 2017 a lot of people started visiting the British Museum. Also, the number of visitors of the Tate Gallery has increased. However, when it comes to the National Natural History Museum and Science Museum we can not say the same as the statistic of their attendance in 2017 is lower than in 2013.

The reasons of this situation are obvious. I think that it connects with the fact that the Science Museum is not appeal to all of us. To increase the interest to the science you should fill the rooms with modern technologies. When it comes to the Natural History Museum, it would be better to make the prices lower for students. It will increase the number of visitors of all ages.

So, I can conclude that ~~now~~ the substantial number of <sup>visitors</sup> ~~people~~ who attend the museums and galleries, which connect to arts is increasing rapidly, however, some <sup>people</sup> ~~visitors~~ think that ~~visiting~~ <sup>visiting</sup> the science or <sup>museums</sup> ~~nature~~ does not respectively appeal to them. So, we should do some changes and the situation will be better in the nearest future.
